SUPERIOR COUNTRY ACCENTS

OFFERS HIGH-QUALITY STRUCTURAL PERGOLAS IN BOTH ALUMINUM AND VINYL IN A VARIETY OF SIZES AND STYLES

What is a Pergola?

A pergola is an outdoor structure comprised of wood, vinyl or aluminum and used to define an outdoor space with select variations of shade or privacy. Pergolas are also a practical solution for protecting a homeowners outdoor space from direct contact with the elements.

How are they typically used?

A pergola can be either free-standing or attached to your home over a patio or deck.

Attached pergolas function more as an extension of your home and extend out directly from the wall of your home, usually centered over a patio door that opens up to your outdoor living space. A homeowner can install a free-standing pergola just about anywhere, including patios, decks, yards, and gardens.

Raised garden beds reduce soil compaction, drain away excess moisture from plant roots, and facilitate greater yield of vegetables and flowers per square foot.

Raised beds are a stylish way to design a garden. They can also serve as a necessary tool for growing in areas with poor soil conditions (including compacted clay soil) or bad drainage.
