LAWN & GARDEN

SUPERIOR PERGOLAS

High-quality structural vinyl pergolas with a variety of sizes, colors and styles available.

What is a Pergola?

A pergola is an outdoor structure comprised of wood, vinyl or aluminum and used to define an outdoor space with select variations of shade or privacy. Pergolas are also a practical solution for protecting a homeowner's outdoor space from direct contact with the elements.

How are they typically used?

A pergola can be either free-standing or attached to your home over a patio or deck. Attached pergolas function more as an extension of your home and extend out directly from the wall of your house, usually centered over a patio door that opens up to your outdoor living space. A homeowner can install a free-standing pergola just about anywhere, including patios, decks, yards, and gardens.

A Breath of Fresh Air

Superior's lattice products are perfect for use on outdoor projects that require a semi-private screen or dividing panel. Vinyl lattice is far superior to traditional wood lattice, since neither poly nor vinyl lattice will separate, split, or splinter, and it will never need to be sealed or painted. C & H-channels available for finishing.
